

Scoring Readiness Tools and Next Steps

If You Scored in the GREEN Band

- Schedule an audit or packet review. The work here is polish, coordination, and mock hearings.
- Confirm the packet mailing date on the calendar and build backward from it.
- Begin requesting letters now — letter-writing takes longer than clients expect.

If You Scored in the YELLOW Band

- Identify the two or three lowest-scoring domains and build a sprint engagement around them.
- Do not wait on support letters — request them in parallel with the sprint work.
- Schedule the first mock hearing by Week 8 even if the packet is not yet final.

If You Scored in the RED Band

- Full representation is recommended, or an Audit first if the hearing is far enough out to rebuild.
- Address red-flag overrides first — they will sink an otherwise competent packet.
- If programming gaps are severe, request chronos and enroll in every available self-help group immediately; documentable progress over time is the currency of a parole hearing.
